Community-based Instruction (CBI) is an evidence-based practice that assists in both improving transition outcomes and generalization of skills from school to the

community. With students who have significant support needs, such as severe intellectual disabilities or challenging behaviors, CBI is of added importance, but additional planning and onsite supports are needed to assure student success. During this webinar, Daniel J. Baker, Ph.D.; NADD-CC, will focus on the details that should be considered.

After registering, you will receive a confirmation email containing information about joining the webinar.
